## **VHHA to Sunset COVID-19 Hospitalization Data Dashboard on Thursday, April 27, 2023**

During the early days of the COVID-19 pandemic, the VHHA Data Analytics and Emergency Preparedness teams collaborated with member hospitals and health systems to establish a daily data reporting protocol documenting the volume of coronavirus hospitalizations across the Commonwealth along with other key pandemic-related metrics. That data was used to inform the Virginia Hospital COVID-19 Data Dashboard, an interactive online tool VHHA first published in April 2020 and updated with daily summary information since then. Overall, the dashboard has been viewed more than 7.7 million times and has been an invaluable resource to help health care providers, state and federal government partners, the public, and the news media gain a clearer picture of the impact of the pandemic on hospitals and the health care delivery system. Now, with the federal COVID-19 public health emergency slated to end May 11 and statewide coronavirus hospitalizations at relatively low levels, VHHA is discontinuing publication of the data dashboard as of Thursday, April 27, 2023.
